**BRAIN GYM® 101 COURSE in Falmouth, Maine
TRAIN THE BRAIN FOR EFFICIENT LEARNING
August 16-19, 2010. 8:30 – 3:30pm**

**Beautiful Location: Friends School of Portland,
1 Mackworth Island, Falmouth, Maine**

Brain Gym® is a brilliant synthesis of physical activities that help children and adults change old, ineffective patterns of learning and behavior by developing neurological brain integration. The activities assist individuals in improving reading, comprehension, listening, memory and focus. Brain Gym® also assists those with challenges of fetal alcohol syndrome, dyslexia, ADD and ADHD. Paul Dennison, PhD, an expert in child motor development, developed this program. It is based upon years of on-going research by educational therapists, developmental optometrists and other developmental specialists.

The fundamentals of Brain Gym® are presented in this experiential course over four days (total 24 hours). Content includes current brain research, the 26 basic Brain Gym® exercises, Brain Gym® “balances”, repatterning and classroom activities. A newly revised professional Brain Gym® manual and handouts are included in the price as is a year’s membership in The Brain Gym International Foundation.

This course is open to all and recommended for educators, parents, therapists, and coaches.

PRESENTER: Beth’s background includes 40 plus years of teaching and coaching, She has traveled and taught throughout Maine. Her private practice is in Portland.
