

# Water Rolls

Friends School of Portland, 5th, 6th 7th graders  
March 2017

## Chorus

*Water rolls from the mountains,  
Down to the rivers, out to the sea.  
Water rolls from the mountains  
Down to the rivers to the ocean where it free*

Water rising from the sea, forming clouds above  
The sky fill up with a salty mist, we know somethings just begun  
Moisture circling in the air waiting to be released  
Evaporations all around flying above the trees

## Chorus

High in the mountains snow comes down, blanketing the earth  
Trees fill up with a fluffy powder that will bring the worlds new birth  
In the spring the rains eat away at the slowly melting snow  
When the snow goes away, away we go Down the river but know one knows

## Chorus

Before the sun comes out and starts a brand new day  
Run off water surrounds and brings life to all in her way  
The ramming, pounding rain slips through all the insecure remains  
It's also not so good you see, fertilizer, pesticides in thee.

## Chorus

Everyday we walk to the river and fill our water jugs  
Mothers, fathers, children gather there with hugs  
We celebrate the water that nourishes our lives  
We must teach our children sacred water helps us thrive

## Chorus (x2)
